

I support the proposal for the new hospital facility. It is my understanding that the facility will be funded by Medicare/Medicaid reimbursement and revenues from the VCHS. If we don't take advantage of this monetary opportunity from Medicare/Medicaid, the money will go elsewhere. It is crucial that we update our facilities to meet modern standards to ensure recruitment of quality healthcare professionals as well as retain the quality staff that already exists. We must be progressive in thought and action in order for our community to thrive. We cannot accomplish this without our hospital. Vote YES on May 13 for the new hospital facility.

Onward and Upward
